Tumor-repopulating cell-derived microparticles elicit cascade

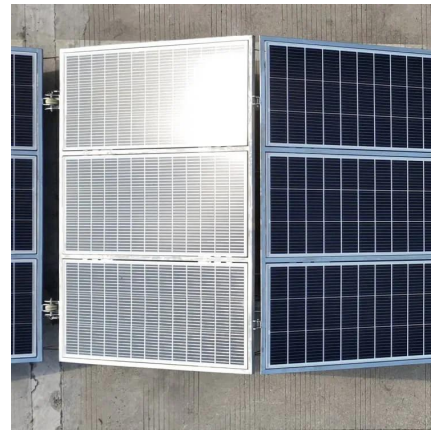

Here, we developed tumor-repopulating cell (TRC)-derived microparticles with exceptional tumor targeting to deliver doxorubicin (DOX@3D-MPs) for improve anti-PD-1 therapy.

Enhanced anti-tumor and anti-metastasis therapy for triple negative

Tumor growth and metastasis are multistep processes regulated by multiple signaling pathways. The successful treatment of cancer largely depends on th...

[CXCL13 expression in mouse 4T1 breast cancer ...](#)

To explore the possible role of CXCL13 in the breast cancer microenvironment, mouse triple negative breast cancer (TNBC) was lentivirally transfected to stably overexpress ...

Biomaterial-based scaffold for in situ chemo-immunotherapy ...

The immunosuppressive tumour microenvironment impairs immunotherapy in poorly immunogenic cancer. Here, the authors load an alginate gel with GM-CSF, CpG ...

Gene expression in tumor cells and stroma in dsRed 4T1 tumors ...

To verify tumor growth in the eGFP mice (Figure 1A), a fluorescence dissection microscope with UV-filter optics for dsRed and eGFP was used. As shown in Figure 1B, a red 4T1 mammary ...
