

150-foot folding container from Riga for drone station

Overview

Can heavy-cargo drones transport sealed cargo containers from indoors-to-indoors?

Transporting sealed cargo containers from indoors-to-indoors is our specialty. Combined with our cooling capability and advanced cold-chain data tracking solution, you can now utilize heavy-cargo drones for automated and easy cold-chain logistics. Indoors-to-indoors data visibility, 100% automation, 100% punctuality.

How much cargo can a drone carry?

The patented Droneliner is a transformational global airfreight system. It can carry 350 tons of cargo in up to 80 lightweight 20ft shipping containers in a remotely-piloted roll-on/roll-off drone, providing low-cost, low-emissions, fast worldwide bulk cargo delivery. Decisions to ship by air or sea come down to two factors – Cost and Time.

What is a drone-in-a-box (Diab) system?

Drone-in-a-box (DiaB) systems, also known as droneports, provide an all-in-one enclosed solution for battery-powered UAVs (unmanned aerial vehicles) that incorporate a landing pad and a drone charging station.

What can drones do for a cargo ship?

Emissions Research: Drones equipped with sensors fly around a cargo ship to measure emissions and air quality, providing data for research on reducing ship emissions and improving fuel efficiency. 10. Aerial Surveying and Mapping Overview: Air drones provide detailed aerial surveys and mapping of ports, waterways, and coastal areas.
