# 220v1500w how big an inverter should I buy

## Overview

---

Do I need an inverter size chart?

The need for an inverter size chart first became apparent when researching our DIY solar generator build. Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly.

What are the different solar inverter sizes?

Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly. During our research, we discovered that most inverters range in size from 300 watts up to over 3000 watts. In this article, we guide you through the different inverter sizes.

What is inverter size?

Inverter size is measured in watts (W) and depends on two key specs: \*

Important: Your inverter must cover both the total running watts of all devices plus the highest surge wattage of any single appliance.

3. Step-by-Step: How to Calculate Your Inverter Size

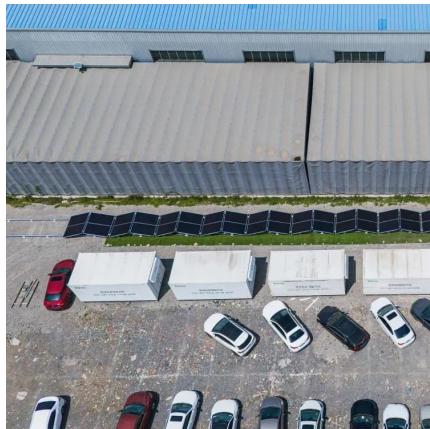

Include: Home: Fridge, lights, TV, microwave, AC.

How much power does a solar inverter need?

Combine your findings: Highest Surge: e.g., 600 W from fridge. → Recommended Inverter Size: 1,200 W minimum. If you later add an air conditioner (2,400 W surge), you'd bump up to a 3,000 W inverter—like the Lefor 3000W in the Lefor Solar Inverter Series.
