

Amman Solar Base Station Brand Ranking

Overview

Is Amman a good place to install solar panels?

The topography around Amman, Jordan is hilly and mountainous. Areas to the east of Amman, including the Zarqa Governorate and parts of the Madaba Governorate, are mostly flat and would be most suitable for large-scale solar PV installations.

How should solar panels be positioned in Amman?

In Autumn, tilt panels to 36° facing South for maximum generation. During Winter, adjust your solar panels to a 47° angle towards the South for optimal energy production. Lastly, in Spring, position your panels at a 24° angle facing South to capture the most solar energy in Amman, Jordan.

How much solar power does Amman have?

Seasonal solar PV output for Latitude: 31.9555, Longitude: 35.9435 (Amman, Jordan), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 8.77kWh/day in Summer.

Is Amman a suitable location for solar photovoltaic (PV) generation?

Amman, Jordan (latitude 31.9555, longitude 35.9435) is a suitable location for solar photovoltaic (PV) generation, thanks to its northern sub-tropical climate that provides ample sunlight throughout the year.
