Battery Inverter E3

Overview

What is an E3 DC home power station?

The E3/DC home power station is a compact DC system solution with an inverter, a charge controller, energy management and an storage battery. The All In One solution is very efficient and economical, due to the high degree of independence it offers. AC-coupled systems are integrated into the circuit after the photovoltaic system inverter.

How many kWh can a storagepro E3 charge?

The Ampere.StoragePro E3 system is available in six versions, offering capacities from 6.6 kWh to 23.1 kWh, and can be cascaded up to 231 kWh. EKD claims that prismatic lithium iron phosphate (LFP) cells in the Ampere.StoragePro system increase safety and support up to 12,000 charging cycles. It guarantees full performance for 10 years.

How can e3/dc metering data be integrated into the energy management system?

Thanks to the holistic concept, the measurement data and electricity market forecasts can be integrated into the E3/DC portal and flow into the energy management system. We are paving the digital way: our partner Inexogy is acting as a competitive metering point operator for E3/DC throughout Germany.

Can I use a multi-function keypad with E3N?

Refer to the multi-function keypad. Some functions cannot be used with E3N. Inverter operation is not possible when the inverter AC input power supply (main power supply) is not ON. In such cases as when supplying power via a PWM converter or when using a DC bus bar connection, set main circuit power cutoff detection to "None".

Battery Inverter E3

Staco E3 924

In the event of an AC power failure, the Staco E3 924 will automatically transfer to battery power and continue to provide power without any interruption for the full amount of time ...
