

Battery energy storage for electricity distribution in the Netherlands

Overview

Where is the Netherlands' largest stand-alone battery energy storage system located?

Dispatch, a Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS). This groundbreaking 45MW/ 90MWh utility-scale BESS will be located in the port area of Dordrecht, on a 6000m² site and will be used for grid stabilization by storing excess energy from renewable sources.

Is the Netherlands a good market for battery storage?

The Netherlands is an emerging market for battery storage but, due to the lack of saturation, also a highly exploitable one. In early 2025, enspired, together with Flexcity and S4 Energy, reached an exciting milestone by taking the country's first 4-hour BESS live in a cross-market optimization setup.

How big is the energy transition in the Netherlands?

ESNL adds to the numbers The energy transition in the Netherlands gets a powerful boost: follows the the data from CBS counted at the end of 2024 our country 84 large-scale battery storage systems (≥ 1 MWh), accounting for a combined capacity of 350 megawatts (MW) and a total storage capacity of 620 megawatt hours (MWh).

What is a battery energy storage system (BESS)?

The Dutch electricity market is transforming with increased solar, wind and other renewable power, creating opportunities and challenges. Battery energy storage systems (BESS) are vital for managing market volatility and capitalizing on price fluctuations.
