Can the battery of a home solar light be replaced

Overview

Should I replace my solar light batteries?

For example, if your solar lights had NiCd or NiMH 1.2V 600mAh AA batteries, then we would recommend you replace them with our 1.2V NIMH AA 600mAh solar light batteries. The capacity of your old batteries is usually printed on the batteries in a mAh rating.

How often should solar light batteries be replaced?

Worn-out solar light batteries may result in acid leakage, which can cause damage to the solar light's electrical components. It's a good idea to replace the rechargeable solar light batteries at least once a year to ensure adequate lighting and longevity. Which are the most suitable replacement batteries for my solar garden lights?

How do you replace a battery in a solar garden light?

The short answer is that in most solar garden lights you can simply remove the battery cover, take out the old batteries which came fitted with the device, and replace the battery with a new rechargeable battery of the same specification. But which type of battery do you need?

Are there any other special steps you must take?

Can I replace my old solar light battery with a different mAh rating?

Yes, you can replace your old solar light battery with a slightly different mAh rating, provided it has the same voltage as the old one. However, be sure to choose replacement batteries with the closest possible mAh rating. We don't recommend replacing your solar light batteries with a much higher mAh rating.
