.

Should I buy an off grid inverter?

When purchasing an off grid inverter, you have to make sure it suits the size of your solar panel system. For example, if your solar panel array has a combined power of 5kW then a 5,000 W inverter should be just right for it. Consult with the manufacturer when in doubt and read the guidelines.

Can you use a grid-tie inverter for an off-grid solar PV system?

You can't use a grid-tie inverter for an off-grid solar PV system. It can easily damage the whole system and here is why. Grid tied inverters have a control device to match the inverter cycles with the utility grid cycles. They need to be in phase, otherwise the voltages will cancel each other out.
