# Construction solar container cost in wind power stations

## Overview

---

How much does it cost to build a wind turbine?

**Wind** The average construction cost for U.S. onshore wind turbines increased 1.6% in 2022 to \$1,451/kW. Higher costs were driven by increases in construction costs for wind farms greater than 100 megawatts (MW) in nameplate capacity. The cost for wind farms between 100 MW and 200 MW of capacity increased by 10% to \$1,614/kW.

How much does solar cost per kilowatt (kW)?

The recently released data examine trends from past years. Discussion of additional cost information and trends is available in our Short-Term Energy Outlook. Solar Average U.S. solar construction costs across all solar panel types increased 1.7% to \$1,588 per kilowatt (kW) in 2022.

How much does a wind farm cost in 2022?

Higher costs were driven by increases in construction costs for wind farms greater than 100 megawatts (MW) in nameplate capacity. The cost for wind farms between 100 MW and 200 MW of capacity increased by 10% to \$1,614/kW. Construction costs for the largest wind farms—those with more than 200 MW—also increased to average \$1,402/kW in 2022, up 1.4%.

How much do solar panels cost in 2022?

Solar Average U.S. solar construction costs across all solar panel types increased 1.7% to \$1,588 per kilowatt (kW) in 2022. The increase was primarily driven by a 13% increase in the construction cost for crystalline silicon tracking panels, which increased to \$1,605/kW, the highest price since 2018.
