

EU PV Panel Inverter

Overview

How big is the European solar inverter market?

The European solar inverter market is set to grow from USD 2.85 billion in 2024 to USD 3.66 billion by 2029, with a growth rate of 5.06% annually. This growth is driven by government incentives, investments in solar energy, and a focus on reducing carbon emissions. Germany is the largest market, followed by the UK and France.

What is the European standard for photovoltaic inverters?

This European Standard describes data sheet and name plate information for photovoltaic inverters in grid parallel operation. The intent of this document is to provide minimum information required to configure a safe and optimal system with photovoltaic inverters. In this context.

Who makes the most solar PV inverters in the world?

In 2023, the global shipment of solar PV inverters reached 536 GWac, with Chinese solar inverter manufacturers responsible for half of these shipments. Companies like Huawei, Sungrow, and Ginlong Solis dominate the top ranks, securing more than 50% of the global market share.

What is the global PV inverter market size?

Based on product, the global market has been categorized into central PV inverters, string PV inverters, micro-PV inverters, and others. String PV inverter accounted for the largest market share in 2021 and is projected to grow at the highest CAGR of 6.05% to reach USD 8,814 million during the forecast period.
