

# Energy storage module product features

## Overview

---

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C delta between cells.

What is a solar battery module?

Ideal for retrofitting existing solar systems or building new setups, the Battery Module guarantees efficiency and reliability in any energy solution. Key features: The AC Battery features a battery module that offers a seamless plug-and-play solution compatible with any third-party solar inverter.

Why do we need energy storage systems?

Energy storage systems provide a wide array of technological approaches to manage our supply-demand situation and to create a more resilient energy infrastructure and bring cost savings to utilities and consumers.

How does a solar battery module work?

The system supports cloud-based monitoring through Wi-Fi or 4G, offering real-time data for optimized management. Ideal for retrofitting existing solar systems or building new setups, the Battery Module guarantees efficiency and reliability in any energy solution.

## Energy storage module product features

---

### Energy Storage System

Whole-life Cost Management Thanks to features such as the high reliability, long service life and high energy efficiency of CATL's battery systems, "renewable energy + energy ...
