

Flat-panel solar tile roof

Overview

What is a flat roof solar installation?

Flat roof solar installation offers unique advantages that many homeowners and businesses overlook. While sloped roofs dominate the residential solar market, flat roofs provide exceptional flexibility for optimal panel positioning, easier maintenance access, and often superior energy production potential.

What is a Solar Tiled Roof?

A Solar Tiled Roof is a system that combines solar and roofing functionality into a perfect energy production system without compromising the visual appearance of your home. The building-integrated modules for tiled roofs interlock with nearly all concrete and clay tiles, leaving your home as beautiful as it ever was. Solar Tiled Roof is for homeowners looking to harness solar energy in an aesthetically pleasing way.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What is a GoodWe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, that also maximises your rooftop space for more solar production. The integrated tempered double-glass structure ensures the safety of the roof structure.
