

Foldable container with two-way charging high cost-performance ratio

Overview

How can a foldable container reduce the cost of storage?

The satisfaction of such conditions and the eventual adoption of the foldable container by the market would reduce the operation costs by 50% to 60% , the storage space in yard and depot by 80% and CO 2 emissions by 20% [8, 12].

Could a five-in-one foldable container design boost efficiency?

A five-in-one foldable container design certified by the International Geneva-based International Standard Organization (ISO) could boost efficiency and transform the carriages of empties, claims Florida-based Compact Container Systems (CCS). The SeaFold container opened out and stacked Credit: Compact Container Systems.

Could a seafold 40' container slash the cost of repositioning empty containers?

More than a fifth of containers are returned empty to their port of origin empty, according to estimates. CCS claims that the SeaFold 40' box could potentially slash the cost of repositioning empty containers by 56%, save storage space by 80%, and drive down carbon emissions by 70%.

Why should you choose a foldable container?

But on the way back with the empty condition, the foldable container could deliver cost reduction up to 35.6% compared to the standard container. Furthermore, the longer the period of storage and transportation in empty state, the greater the benefit of the foldable container.
