

Funafuti distributed energy storage enterprise

Overview

What is user-side energy storage?

User-side energy storage can not only absorb renewable energy such as solar energy, but also maintain a stable power supply for houses. German energy supply company which called SENECSIES adopts a “free lunch” energy storage business model. SENECSIES installs energy storage systems for users who own home photovoltaics.

How can energy storage be profitable in China?

Actively support the diversified development of user-side energy storage. Encourage user-side energy storage such as electric vehicles and uninterruptible power supplies to participate in system peak and frequency regulation. Explore new energy storage models and new formats . Energy storage can be profitable with policy subsidies in China.

What is energy storage ancillary service profit?

The energy storage ancillary service profit is 200 ¥/kWh, and the lease fee is 330 ¥/kWh, and the priority power generation incentive is 16 million ¥/year .

3.6. Shared energy storage model Shared energy storage is a new energy storage business model under the background of carbon peaking and carbon neutrality goals.
