

Georgia offshore solar panels

Overview

How many solar farms are there in Georgia?

As of December 2025, there are 152 utility-scale solar farms in Georgia, according to Cleanview's project tracker. Their total operating capacity is 5,414 MW. In 2024, there were 8 solar farms built in Georgia. Click any of the links below to jump to a specific section: To see a list of the top solar developers in the US, check out this page.

What is the largest solar farm in Georgia?

The largest solar farm in Georgia is Wadley Solar as of December 2025. The project is located in Jefferson, GA and has a capacity of 260 MW. Cleanview tracks 10,000+ power projects, 1,000+ data centers, and 700+ developers in the U.S. Each month we spend hundreds of hours researching and updating our database.

Does Georgia have a solar market?

National Solar Capacity Ranking: 7th Data Current Through: Q1 2025
Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort.

Who is offshore solar?

Worldwide leader in Offshore Solar — in harmony with nature. For developers and operators who need more bankable energy output from the same area, we deliver (floating) offshore solar you can build and operate now.
