# **Guyana Solar Panel solar Power Generation Project**

## Overview

---

How many solar PV farms will Guyana have?

The main electric utility, Guyana Power and Light Inc. (GPL) is preparing plans for 3 utility scale solar PV farms totaling 30 MW for the national grid in the long term, as well as 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

How is solar energy used in Guyana?

In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas. Under the Hinterland Electrification Programme, in excess of 19,000 solar PV systems had been installed in nearly 200 communities by 2018.

How many solar panels will be installed in Guyana in 2019?

In addition, 1.184 MW of solar PV systems will be installed at 80 public buildings in all 10 Administrative Regions of Guyana in 2019. These installations will result in estimated savings of G\$114 million and avoiding 1,415 tons of CO 2 emissions per year.

Is Guyana a good place to install solar PV?

As a result, most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh.

## Guyana Solar Panel solar Power Generation Project

### **Largest solar PV farm in Guyana to be constructed in Linden, ...**

So, Linden is going to have the largest solar farm that will be deployed in the short future in Guyana at Retrieve," he explained. These solar farms, he noted, would be supported ...
