

# High-efficiency energy storage container for water treatment plants in Nepal

## Overview

---

What is a water treatment plant in container?

A water treatment plant in container is a complete solution, assembled and tested off-site at our factory. The solution is complete with all internal piping and wiring factory-built. This makes the plant ready for use when supplied, which financially can be an advantage, also in relation to the reduced amount of time used for deployment.

What is a power plant container?

Fully equipped container designed for a power plant. The water is used for cooling water (8 m<sup>3</sup>/h), boiler water for high pressure steam turbine (6 m<sup>3</sup>/h) and drinking water. The container is insulated and equipped with door-in-door, light, and air-conditioning. The container includes the following plants:.

What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.
