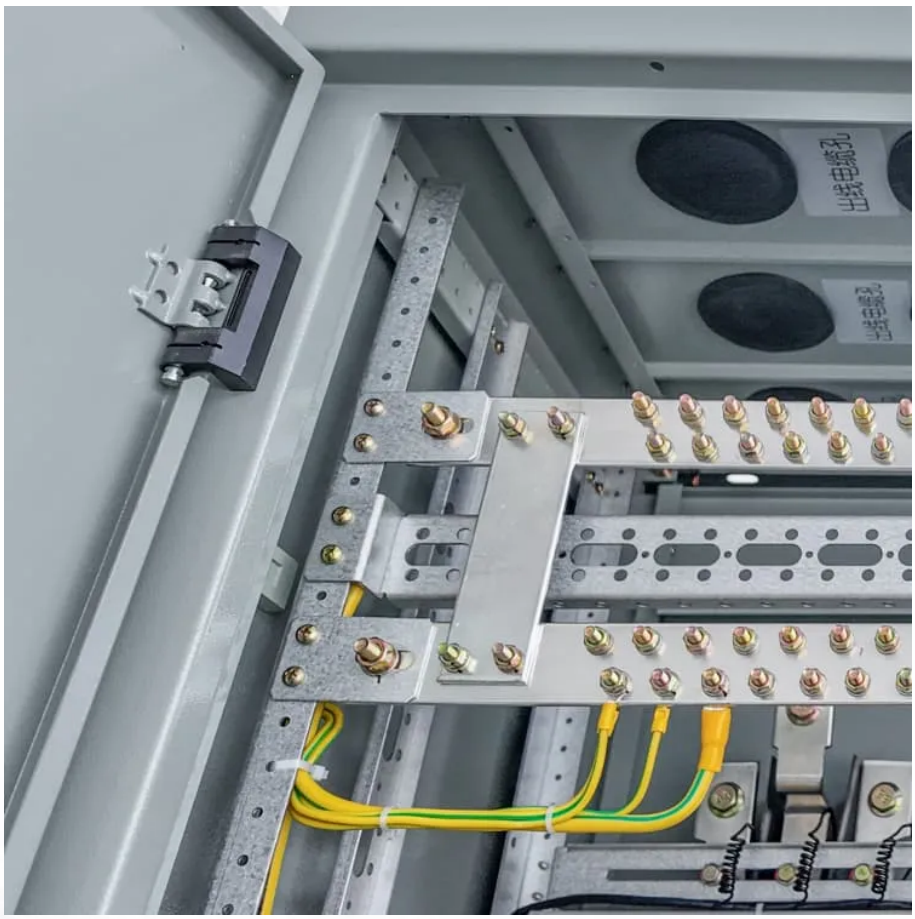
House installation of solar panels



Overview

How do you install solar panels on a house?

1. Attach the solar panels to the roofs of the houses using looped pieces of duct tape. Attach the light, buzzer or motor, in a circuit using wires and alligator clamps (see Figure 5 and the diagram in Figure 1). Then, use hot glue to secure the roofs to the building walls. 2.

Are solar panels worth it?

Solar panels are only ever going to be worth it if you can afford them. Be careful if you need to take out a loan as the interest repayments might be higher than your returns. And while it’s important to think about the money, lots of people see the environmental impact as the key reason to invest in solar panels.

Can I install solar panels myself?

Technically, you can install solar panels yourself, but we wouldn’t recommend it. We don’t doubt your handy work, but a trained professional with an MCS certificate will be able to install solar panels to the standard you’d ideally want – and to the standard expected by the Smart Export Guarantee.
