How to fix the new energy battery cabinet

Overview

How to protect a lithium battery energy storage cabinet?

At the same time, setting the charging and discharging parameters, configuring the safety and protection settings, and protecting the lithium battery energy storage cabinet from potential dangers such as overcurrent, overvoltage, and overtemperature are necessary.

How do I reinstall a battery cabinet?

Perform the following steps on all battery cabinets in the battery solution.

- Remove the cover in front of the start-up button and push the start-up button.
 - The PSU2 LED and the POWER LED will turn on.
 - The ABNORMAL and ALARM LEDs should remain off.
- Reinstall the cover in front of the start-up button.

Why is a battery cabinet dangerous?

- The battery cabinet contains an internal energy source. Hazardous voltage can be present even when the UPS system is disconnected from the utility/mains supply. Before installing or servicing the UPS system, ensure that the units are OFF and that utility/mains and batteries are disconnected.

How do you protect a battery cabinet?

High-quality cables, connectors, and terminals establish safe electrical connections between battery cabinets and other system components. And add appropriate fuses and circuit protection devices to the circuit to prevent overcurrent, overvoltage, and short circuits.
