

# Huawei East Asia Energy Storage Integrated Battery Project

## Overview

---

Why is Huawei reshaping the future of Energy Innovation?

By leveraging Huawei's cutting-edge digital power technologies and Keppel's expertise in energy management, we are not only meeting the growing demand for renewable energy to support Singapore's global leading position in green development - we are reshaping the future of energy innovation.

How will Huawei & Keppel work together?

Through this partnership, we will harness Huawei's digital power technologies and Keppel's deep expertise in energy infrastructure to enhance the reliability and seamless integration of renewables with state-of-the-art energy storage.

What will Huawei Malaysia do as a technology enabler?

As the technology enabler, Huawei Malaysia will contribute its global expertise and innovation leadership through product manufacturing, technical sharing and market supply of its globally renowned advanced Smart PV and BESS technologies.

How will Huawei & Keppel collaborate on a demand response programme?

In Singapore, both parties are collaborating on a demand response programme using a BESS developed at Keppel Infrastructure @ Changi. The BESS will allow Huawei and Keppel to further explore novel smart operations and maintenance solutions to enhance the reliability, performance and efficiency of renewable energy assets.

## Huawei East Asia Energy Storage Integrated Battery Project
