Huawei Indonesia Energy Storage Power Supply Procurement Project

Overview

What is Huawei doing with sepcoiii?

Huawei signed a contract with SEPCOIII last October to supply its Smart PV+Storage solution for a 400 MW PV plus 1300 MWh energy storage project in Saudi Arabia. This 1300MWh off-grid energy storage project is the world's largest microgrid energy storage project and sets a benchmark for the development of the global energy storage industry.

How Huawei is transforming the energy industry?

Leveraging power electronics and digital technologies, Huawei makes efforts to build a new power system based on renewable energy sources to drive the energy transformation. Also, the company endeavors to pursue the state-of-the-art energy storage system that plays a critical role in the resilient electricity grids of the future.

How can Huawei improve the economy of Indonesia's power supply?

In terms of economy, Huawei uses microwave and Wi-Fi ad hoc networking and artificial intelligence technologies to develop an intelligent inspection solution for transmission lines. This solution greatly improves O&M efficiency, reduces O&M costs, and helps improve the economy of Indonesia's power supply.

Does Huawei support Indonesia's electric energy industry in digital transformation?

Huawei has cooperated a lot with Indonesia's energy power industry in the ICT field and support Indonesia's electric energy industry in digital transformation. Digital transformation is the key to supporting energy transformation and finally achieving zero emission.

Huawei Indonesia Energy Storage Power Supply Procurement Project

From blackouts to breakthroughs

To address these challenges, PLN deployed Huawei OceanStor Dorado, a high-performance storage solution that provides faster read/write speeds, while reducing power consumption threefold.
