

# Huawei Nuku alofa cylindrical power battery pack

## Overview

---

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 KWh up to 15 KWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

How many kWh can a Huawei luna2000 5 / 10 / 15 charge?

Modular system with 5 kWh stackable battery packs with 100% discharge capacity. Huawei presents the lithium battery (Lithium Iron Phosphate – LFP) Huawei LUNA2000-5 / 10 / 15. This high voltage battery is compatible with a wide range of inverters on the market. It will be possible to connect two systems in parallel for a total of 30kWh.

What is the new luna2000 battery?

The new LUNA2000 battery as well as the new generation of Huawei inverters and optimizers are automatically detected by the Huawei Solar App, allowing for simple and quick commissioning. – Compatibility assured Compatible with Huawei single-phase and three-phase residential inverters.
