

Huawei Peru dedicated solar container battery

Overview

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 kWh up to 15 kWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

What is Huawei luna2000-215-2s10?

The Huawei LUNA2000-215-2S10 is a battery energy storage system (BESS) designed for commercial and industrial (C&I) installations. This product is available in the 215kWh size, and up to five units can be connected within the same system, making it possible to achieve capacities exceeding 1 MWh.

Why should you buy a Bess system from Huawei?

This flexibility allows the system to adapt to various applications, including peak shaving, self-consumption, and time-shifting. In terms of safety, the new BESS solution from Huawei features an IP55 protection rating, making it resistant to dust and water splashes, even in outdoor environments.
