

Huawei s thin-film solar panels in Krakow Poland

Overview

How many solar projects are there in Poland?

Poland's solar capacity neared 22 GW at the end of March, according to figures from the country's Institute of Renewable Energy. There are currently 532 solar projects with a capacity equalling 950 MW with valid building permits. News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Is solar curtailment on the rise in Poland?

Solar curtailment is on the rise in Poland, with around 600 GWh of PV capacity reduced during the first six months of 2025. The Warsaw-based Institute for Renewable Energy (IEO) suggests one solution is to support the electrification of Poland's heating sector with the surplus of PV power.

How much does Poland's solar rebate scheme cost?

The budget for the sixth round of Poland's rebate scheme for residential solar and storage installations was extended to a record PLN 1.85 billion (\$511.8 million), up from an original PLN 400 million, after receiving 121,000 applications. Over half of the budget will be allocated to home energy storage facilities.
