

# Led induction street light solar light home use

## Overview

---

What is induction street lighting?

Street Lighting. Induction street lighting are frequently used as replacement lighting fixtures for the older HID in many airplane hangars, aircraft maintenance hangars, industrial and manufacturing facilities with their extensive access roadways and large parking areas. Induction street lighting has longer life spans than ordinary street lamps.

How to build a solar powered LED street light with auto intensity control?

The Solar Powered Led Street Light with Auto Intensity Control can be built using battery, controller, solar panel, the pole and interconnecting cables.

What is a solar street light?

A solar street light is a raised lighting system powered by a photovoltaic (PV) module charging a battery that runs an LED luminaire at night. Modern systems are off-grid, smart-controlled, and designed to operate through low-sun periods. Pole/brackets & wiring, optional sensors/remote monitoring.

Which solar street lights are available?

Our All-In-One Solar Street Light is available in the SIRIUS (INL-AIO9), GALAXY (INL-AIO6), ALIEN (INL-AIO5), and POLARIS (INL-AIO2) series. Utilizing the latest integrated design, the lithium battery, solar controller, and solar panel are all housed within the light casing.
