

London Mobile Power Station Generator BESS

Overview

Will Bess be largest on UK grid?

BESS at Thurrock Flexible Generation site expected to be largest on UK grid when commissioned. Statera Energy has secured \$512 million (GBP 395 million) of debt financing for a UK storage and flexible generation project comprising a 300 MW/600 MWh battery energy storage system (BESS) co-located with a 450 MW gas-fired plant.

Are mobile battery energy storage systems a viable alternative to diesel generators?

Mobile battery energy storage systems offer an alternative to diesel generators for temporary off-grid power. Alex Smith, co-founder and CTO of US-based provider Moxion Power looks at some of the technology's many applications and scopes out its future market development.

Can mobile battery energy storage systems replace dirty generators?

Fortunately, an innovative, cleaner solution is gaining traction to replace dirty generators: mobile battery energy storage systems (mobile BESS). Mobile BESS products provide mobile, temporary electricity wherever and whenever it's needed.

What is mobile Bess & how does it work?

By storing low-cost off-peak grid power and dispatching it onsite as needed, mobile storage provides operators with emissions and noise-free electricity – often for days or weeks without having to recharge. Mobile BESS products can also charge from local microgrids powered by renewable energy sources like solar panels and wind turbines.
