

Madrid solar container substation production cycle

Overview

How much photovoltaic capacity will Spain have by 2030?

1. The Ministry of Ecolog The Spanish National Energy and Climate Plan (PNIEC) sets a target of 76 GW of photovoltaic capacity by 2030, including 19 GWac from self-consumption and 57 GWac from large-scale projects.

Does Spain need energy storage?

Additionally, Spain is strengthening policies to support the growth of energy storage. The country aims to deploy 22 GW of energy storage by 2030 and 50 GW by 2050. Currently, the total installed capacity of energy storage in Spain—covering planned, under-construction, and completed projects—stands at about 20 GW.

Why did Hitachi energy develop a pre-fabricated Indoor Substation?

Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations. [Learn More.](#)

How much power does Spain have in 2024?

By mid-2024, Spain's total installed photovoltaic capacity surpassed 40 GW, with approximately 3 GW of new capacity added that year—around 2.1 GW from large ground-mounted power plants and 740 MW from self-consumption systems. Additionally, Spain is strengthening policies to support the growth of energy storage.
