Marseille Home Uninterruptible Power Supply

Overview

What is an uninterruptible power supply / UPS?

An uninterruptible power supply / UPS is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.

What is an uninterruptible power source up?

A business with servers and networking equipment may need an uninterruptible power source ups rated at 3000 VA or higher. Runtime refers to how long the UPS can supply power to connected devices during an outage. The runtime varies depending on the size of the battery and the load placed on the uninterruptible power source.

What are the different types of power sources in a UPS system?

In a UPS (Uninterruptible Power Supply) system, there are generally three main types of power sources that ensure continuous power supply during outages or fluctuations. These are:

- AC Input Power Source This is the primary power source, usually from the grid or a local electrical supply.

Who do you partner with for uninterruptible power supplies?

We only partner with suppliers who meet our stringent supply chain standards for quality (ISO 9001), health and safety (ISO 18001), and environmental management (ISO 14001). Browse our full selection of uninterruptible power supplies or contact us today if you have any questions regarding our range. Call 0800 088 5412
