

Marseille large-scale energy storage project

Overview

How much does the port of Marseille Fos project cost?

The project represents an investment of €750 million, with the aim of avoiding 750,000 tonnes of CO2 emissions into the atmosphere every year. The Port of Marseille Fos, as an investor port, is participating in the capital of the project led by H2V, which aims to decarbonise port areas through a cleaner industry tailored to the needs of the region.

How big is Europe's battery energy storage system?

Europe is racing to add very large grid batteries to balance rising wind and solar output. As of mid-late 2025, four utility-scale Battery Energy Storage System (BESS) projects stand out by size — each designed in the 0.5–2.8 GWh class and backed by reputable developers and public filings.

Which battery energy storage system projects are backed by a reputable developer?

As of mid-late 2025, four utility-scale Battery Energy Storage System (BESS) projects stand out by size — each designed in the 0.5–2.8 GWh class and backed by reputable developers and public filings. Below I summarise each project, its capacity, status and why it matters. 1. Green Turtle (Rotem/Dilsen-Stokkem, Limburg — Belgium).

What is Europe's largest battery energy storage system in Belgium?

Sungrow and ENGIE bring Europe's largest battery energy storage system online in Belgium with the completion of its first 400 MWh phase. Nathan G is a reporter from Nairobi, Kenya. He has written for Construction Review for just over four years.
