

# Metal Antimony and solar Glass

## Overview

---

Does solar glass contain antimony?

However, the composition of solar glass varies, especially concerning antimony (Sb) content, depending on the production method. Antimony is used to enhance the performance of patterned solar glass but introduces environmental and health concerns, complicating recycling efforts.

Is antimony used in Photovoltaic Glass?

The flame-retardant sector currently accounts for around half of end use of antimony. "The use of antimony trioxide as a clarifying agent in photovoltaic glass is a developing trend, and it is expected to maintain rapid growth in the coming years," Kang said.

Should PV module manufacturers be required to disclose antimony compounds?

To address these challenges, the ESIA Recommendation paper suggests that the European Union should consider mandating PV module manufacturers under the upcoming Ecodesign regulations to disclose the composition and manufacturing process of solar glass, including additives like antimony compounds.

Can antimony containing solar panels be disposed of?

aic panels and the possible environmental risks or consequences at the end of life of such solar panels. Central Pollution Control Board (CPCB) has filed a report on 'Release of Antimony from Solar Panels and the options for disposal of Antimony containing solar panels' prepared by NGT constituted Expert Members comprising of Professor
