

# Micro solar container lithium battery that can be plugged into a small inverter

## Overview

---

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

What is a lithium battery energy storage system?

Energy Storage System A sophisticated lithium battery energy storage system with an expandable range of 100-500kWh can accommodate excess solar power for stable supply during night hours or cloudy conditions. Inverter.

Can a commercial lithium-ion battery be integrated into a micro-PV system?

A commercial lithium-ion battery was integrated into a commercial micro-PV system. Two alternative battery coupling architectures were developed and demonstrated. The passive coupling uses a parallel electrical connection of the battery. The active coupling uses a controlled converter with MPP charging algorithm.

Can a battery be integrated into a micro-PV system?

The AC power (panel e) clearly shows the effect of partial shading of the PV panels every day at around 11 a.m. The motivation for integrating a battery into a micro-PV system is the possibility to shift PV energy from the day into the night.
