

Mozambique's first wind solar and energy storage power generation project

Overview

Does Mozambique need a hybrid solar-wind system?

This paper presents a comprehensive analysis of Mozambique's energy transition, focusing on integrating a hybrid solar-wind system with green hydrogen storage. It discusses Mozambique's renewable energy potential, particularly in solar and wind, and the country's efforts to meet increasing energy demands sustainably.

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

Does Mozambique have wind power?

Mozambique has a potential wind capacity of 4.5 GW, of which about 25% has potential for immediate connection to the existing grid. The provinces with the most potential are Tete, Maputo, Sofala, Gaza, and Inhambane.

Is Mozambique a sustainable country?

It discusses Mozambique's renewable energy potential, particularly in solar and wind, and the country's efforts to meet increasing energy demands sustainably. The transition offers opportunities for sustainable development and job creation but requires careful management to prevent socioeconomic disparities.
