

National 5G base station construction and communication facilities construction

Overview

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

What is a 5G base station?

A 5G network base-station connects other wireless devices to a central hub. A look at 5G base-station architecture includes various equipment, such as a 5G base station power amplifier, which converts signals from RF antennas to BUU cabinets (baseband unit in wireless stations).

What are the 5G NR Base Station classes?

The 5G NR Base Station (BS) classes include BS Type 1-C, BS Type 1-H, BS Type 1-O, and BS Type 2-O. These classes are part of the 5G NR (New Radio) standard, which follows its predecessor LTE/LTE-A and is defined by 3GPP specifications release-15 and beyond. In 5G NR, BS is known as gNB and operates in frequency ranges FR1 and FR2.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.
