

New Energy Batteries and Energy Storage Industry Chain

Overview

Where are energy storage batteries made in China?

An industrial robot processes energy storage batteries at a plant in Nanfeng county in East China's Jiangxi Province on December 16, 2024. China has 400 plants powered by 5G wireless technologies in high-end manufacturing as of November, data from the Ministry of Industry and Information Technology showed. Photo: VCG.

How will China's new-energy storage industry grow by 2027?

Photo: VCG China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, enhance innovation and competitiveness, and achieve high-end, intelligent and green industry growth.

How can China improve the value chain of new-energy storage manufacturing?

To enhance support for the value chain of relevant manufacturing enterprises and foster a service-oriented manufacturing model, China seeks to drive the extensive adoption of next-generation information technologies, including blockchain, big data, artificial intelligence and 5G, within the new-energy storage manufacturing sector, the plan said.

What is China's new energy storage plan?

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing powerhouse and promoting the efficient development and utilization of new-energy resources. By 2027, China aims to cultivate three to five leading enterprises in the ecosystem.
