New Zealand energy storage cabin fire extinguishing equipment

Overview

Do you need a fire suppression system in New Zealand?

Forestry – Whether you need a system for a work ute or a harvesting machine PSL Fire and Safety offers fire suppression systems that are ideally suited to the demands & requirements of New Zealand's forestry environment.

What is a heavy equipment fire suppression system?

Heavy equipment fire suppression systems protect against threats to operators, assets and productivity. Our suppression equipment is rugged, reliable and easy to maintain. We offer dry chemical, liquid chemical and dual agent systems. Some of the Industries we serve are Mining, Forestry, Agriculture, Waste Handling & Construction.

What should a fire extinguishing system protect against?

The extinguishing system must be designed to protect against dissimilar combustible materials and thus classes of fire. The fire protection systems must be compact, reliable, long lasting and efficient.

What types of fire suppression systems can PSL fire & safety provide?

Mining – PSL Fire and Safety offer a range of intrinsically safe fire suppression systems that are widely used in mining operations & can be tailored to suit the needs of most clients. Construction – whether you are protecting fixed or mobile plant PSL Fire and Safety can cater for your fire suppression system requirements.
