

Oil platforms use 40-foot collapsible containers at a discount

Overview

What is a platform container?

Platform containers consist solely of a floor structure with extremely high loading capacity; they have no side or end walls. This high loading capacity makes it possible to concentrate heavy weights on small areas. A platform consists of a steel frame and a wooden floor structure.

What is a seafold 40' container?

A collapsed bundle of five SeaFold 40' containers accommodates the same slot as one conventional 40' High Cube container creating 80% more storage and operating cost efficiencies at terminals, railheads, and ports, along with reducing lifts and container movement on ships, truck, rail, and barges.

What is compact containers?

Compact Containers serves the global shipping and intermodal industry with an efficient, low-cost means to transport containers by Road, Rail, or Sea. Discover the future of cargo logistics with Compact Containers. Our SeaFold 40' collapsible containers redefine efficiency & cost savings.

What are the benefits of seafold 40 HC container?

By easing trucking burdens, enhancing train transport, increasing container density on ships and inland barges, and reducing port storage footprints, SeaFold containers mark a significant stride towards sustainability and reducing greenhouse gas emissions. What is the product differentiation of CCS' SeaFold 40' HC container?
