

Outdoor Power Lighting System

Overview

What is low-voltage outdoor lighting?

Low-volt is a collection of low-voltage lighting offered by Philips Hue and specially designed for your outdoor spaces. Instead of being wired directly into your home's electricity, Low-volt lights simply plug into any standard wall socket.

How easy is it to set up smart outdoor lights?

It's incredibly easy to set up the outdoor smart lights thanks to the Low-volt collection. One of the benefits of smart lighting is how easy it is to use — whether you control your lights using the Hue app, your voice, motion sensors, or smart switches.

How do I set up solar-powered outdoor lighting?

Setting up solar-powered outdoor lighting begins with careful planning and layout. You need to assess your outdoor space thoroughly to identify where lighting will be most effective, both for security and aesthetic appeal. Walk around your area at different times of the day to observe sun exposure and shadow patterns.

What is the power consumption of the 80-inch outdoor lightstrip?

Both Lily spotlights and Calla pedestals are 8 W each, while the 80-inch outdoor lightstrip is 19 W. Here's an example of a Low-volt setup using a 95 W PSU and three types of lights: Lily spotlights, Calla pedestal lights, and an 80-inch outdoor lightstrip.
