

Philippines outdoor wind power base station price inquiry

Overview

Where is wind energy available in the Philippines?

The greatest wind resources of the Philippines are in northern and central areas, such as Batanes and Babuyan, and the north and central Luzon areas. Because of the high potential of wind energy in the country, wind energy developers are interested in commercializing wind energy in the Philippines.

How much does wind energy cost in the Philippines?

The Philippines is analyzing its wind energy market growth, with projections extending to 2030. The average breakeven electricity price for offshore wind farms stands between PHP 8.028 to PHP 8.306 per kilowatt-hour, reflecting ongoing trends and pricing dynamics in the energy sector.

How much wind energy does the Philippines have?

According to International Renewable Energy Agency, as of 2022, the Philippines' total wind energy capacity accounted for 443 MW. Additionally, the government aims to expand significantly the country's wind capacity in the coming years and targets 35% of energy generation from renewables by 2035 and 40% by 2040.

Are wind turbines the future of energy in the Philippines?

As energy demand rises, wind turbines are helping the Philippines diversify its energy sources beyond fossil fuels and generating power. According to the National Renewable Energy Plan, the Philippines has set the goal of adopting an additional 1,548MW of renewable energy by 2030.
