

Portugal Pumped Storage solar Power Station

Overview

What is Portugal's largest pumped hydroelectric storage complex?

Last year in the Tâmega river, the utility inaugurated Portugal's largest pumped hydroelectric storage complex, one of Europe's largest. With an investment of €1.5 billion, it has three dams and three power plants (Gouvães, Daivões and Alto Tâmega) and a combined installed capacity of 1,158 MW.

Is Iberdrola planning a pumped-hydro storage project in Portugal?

Iberdrola has started approval processes for a 1.32 GW pumped-hydro storage project in Portugal. The Proyecto de Aprovechamiento Hidroeléctrico de Minhéu is set to become the country's largest facility of its kind once completed. From pv magazine Spain.

Will minhéu be the largest pumped-hydro station in Portugal?

If built, it would be the largest pumped-hydro station in Portugal. The Minhéu project is designed to complement Iberdrola's Alto Tâmega hydroelectric complex by increasing the system's energy efficiency and storage capacity. It includes construction of a reservoir in the Cumeada area on Monte de Minhéu, hydraulically linked to the Alto Tâmega dam.

Does Portugal have a hydroelectric power station?

Simultaneously with the increase in solar production in the Iberian Peninsula, the Gouvães hydroelectric power station, which started operating in January 2022, has expanded the installed pumping capacity in Portugal.
