

# **Sanaa s first 5G base station communication**

## Overview

---

What is China's first military-grade mobile 5G base station?

Please contact us for more information. China unveils the world's first military-grade mobile 5G base station, developed by China Mobile Communications Group and the PLA, designed for battlefield use to enable seamless communication for up to 10,000 military robots and drones within a 3-kilometer radius.

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

Is the new 5G base station ready for battle?

Developed to facilitate large-scale drone integration into the PLA, the new mobile 5G station has been rigorously tested and is now ready for battle. The new 5G base station allegedly has unprecedented high-speed, low-latency, and extremely secure and reliable data exchange services to at least 10,000 users within a 1.8-mile (3 km) radius.

Can a 5G base station be used autonomously?

When operating near existing 5G civilian areas, the PLA also has ways to piggyback China's 4.2 million base stations. This can be achieved autonomously and in "the blink of an eye."
