# Shenzhen Energy Smart Energy Storage Project

## Overview

---

What is the Innovation Center Shenzhen?

At the Innovation Center Shenzhen (ICS), our goal is to combine internal and external resources to pioneer new technological products and solutions, speeding up the energy transition in China and internationally. Replacing fossil energy with renewable energy is seen by many as the main way to meet carbon neutral targets.

How has Shenzhen's new energy industry changed in 2021?

In 2021, the added value of Shenzhen's new energy industry was about 64.2 billion yuan, while a number of enterprises with a strong reputation both at home and abroad have emerged in key fields such as nuclear energy, smart grid, solar energy, and energy storage. 2. The supply capacity of new energy has been steadily improved.

What can Shenzhen do for China?

Shenzhen will cultivate and expand a leading group of backbone enterprises and innovation platforms that drive the coordinated development of small and medium-sized enterprises, while also establishing a highland to lead the high-quality development of the new energy industry in China.

What is a container energy storage system?

The container energy storage system helps to use and manage energy more effectively, reduce electricity bills, and can be applied in various scenarios such as peak valley arbitrage for power users, frequency regulation and peak shaving for power grids, improving new energy consumption, and improving power supply stability for power grids.

## Shenzhen Energy Smart Energy Storage Project

[Shenzhen SMS Energy Technology Co.,Ltd](#)

12V/24V/48V/51.2V rack mounted lithium iron phosphate battery, with high energy density, fashionable appearance, easy installation and expansion, is widely used in telecom base ...
