

# Singapore Tomé Mobile Energy Storage Container Single Phase for Field Operations

## Overview

---

Does Singapore need a solar energy storage system?

SINGAPORE – As Singapore seeks to harness as much sunshine as it can to maximise its limited renewable energy sources, it needs to improve technologies that can store excess solar energy from the day. One such technology is energy storage systems (ESS), which are essentially giant batteries packed in containers that store electricity for later use.

What is Sembcorp energy storage system?

The Sembcorp Energy Storage System was launched in 2023. Commissioned in six months, the 285MWh system was Southeast Asia's largest ESS and the fastest in the world of its size to be deployed.

What is Singapore's first utility-scale energy storage system?

Singapore's First Utility-scale Energy Storage System Through a partnership between EMA and SP Group, Singapore deployed its first utility-scale ESS at a substation in Oct 2020. It has a capacity of 2.4 megawatts (MW)/2.4 megawatt-hour (MWh), which is equivalent to powering more than 200 four-room HDB households a day.

What are the safety measures for electrical energy storage in Singapore?

fire risks and electrical hazards. Some safety measures include: Adhering to Singapore's Electrical Energy Storage Technical Reference. Deploying additional fire suppression systems (e.g. powder extinguisher). Having an e
