

Small Uninterruptible Power Supply Model

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers demand.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

What is a mini uninterrupted power supply?

Mini uninterrupted power supply for power outage, compatible with router, modem, security camera, telephone, fax, printer, fingerprint recorder, LED strip lights, ect, and can still use the network in case of power outage. Aluminum housing, Input: 100~240V AC, Output maximum 60W, with 5V USB 2A, 5V DC 2A, 9V DC 2A, 12V DC 2A.

How to choose a power supply for a DC application?

Select the appropriate power supply, uninterruptible power supply, and battery module for your application. Furthermore, our UPS modules with integrated power supply or integrated battery module offer a space-saving UPS solution. Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions.
