

Small-scale solar power generation systems in Eastern Europe

Overview

Which countries have the largest solar power generation portfolios in the EU?

Looking at the countries with the largest solar power generation portfolios in the EU, the picture is the same as for annual additions. Germany is the largest operator of solar power plants in the EU with 82.1 GW.

Who is the largest solar module manufacturer in Europe?

When looking into the European solar module value chain, the largest manufacturer remains the only one active in the solar silicon segment. Wacker Chemie is the sole EU company to operate polysilicon production facilities with a capacity of around 60,000 metric tons in Germany, which translates into over 26 GW of cell/module products.

Does the EU solar sector continue to grow?

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, and the technology's central role in the continent's clean energy transition. Source: eepowerschool.com.

Which country has the largest solar market in Europe?

In 2023, Germany leads the EU solar market in both annual and total installations, with 14.1 GW and 82.1 GW, respectively, widening the gap to the second largest market, Spain, which couldn't continue the pace seen in 2022.
