

Solar curtain wall of office building in Penang Malaysia

Overview

Why do we install solar panels at Balakong & Penang?

By installing solar panels across multiple production facilities and offices at Balakong as well as at Penang, we have lowered our carbon emissions and decreased dependence on non-renewable energy. Our solar panels across all facilities generate 6,500+ GJ annually, directly powering production while cutting emissions.

What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.

Does Yongyang offer financing for solar energy solutions?

Yongyang believes that financing for Green Renewable Energy solutions should be simple and flexible. We work with financing institutions and leading solar companies across the nation to offer financing for solar energy system. Our range of solar solutions will suit your business budget and financial situation.

Why should you choose solar power in Malaysia?

Solar power is a clean, sustainable and eco-friendly energy source that will significantly improve your brand image and reputation. We have an intimate knowledge of Malaysia green energy policy, national solar incentives, and diverse financing options — and solar experts that can help you to get the most from each.
