

# Solar power storage in China in Spain

## Overview

---

Can Spain become a green energy leader?

Spain is trying to position itself as a connector country between China and Europe. After Prime Minister Pedro Sanchez' official visit in September last year, Spain abstained on the EU's Chinese electric car tariffs vote, and now China is investing heavily in Spain's goal to become a green energy leader.

Why is China cooperating with Spain?

"China is a very innovative economy and is developing the highest technologies regarding digital transition and also energy transition. "And in this regard, China is cooperating closely with Spain because, of course, Spain, we are very much engaged in this kind of new approach to a sustainable economy.

Why is China investing in European renewables?

The China Three Gorges corporation is the largest clean energy group in China - and has been investing heavily in European renewables too. China adds more renewable capacity annually than the rest of the world combined and is increasingly exporting that knowledge and know-how, working side-by-side with European partners.
