

Swiss solar container communication station Inverter Battery Testing Agency

Overview

Who are seetalsolar & younergy?

SeetalSolar joined Swiss Solar Group in early 2023 and is a true local hero, serving cantons Lucerne and Aargau. They are known for not just delivering great quality, but also doing so with a smile. Younergy joined Swiss Solar Group in 2023. An impressive team and the self-declared "customer obsession" make it a pleasure to work with Younergy.

How does a PV inverter test work?

Inductive load simulation is crucial for assessing the inverter's capability to handle dynamic loads, voltage transients, and power factor correction in the presence of inductive loads. Another key component of a PV inverter test system is power grid testing, which evaluates the inverter's ability to interact with the power grid.

Why should you implement automated testing in your EV/PV inverter production?

Implementing automated testing in your EV or PV inverter production allows you to evaluate the performance, reliability, and compliance of inverters, providing you with confidence in the quality of your production.

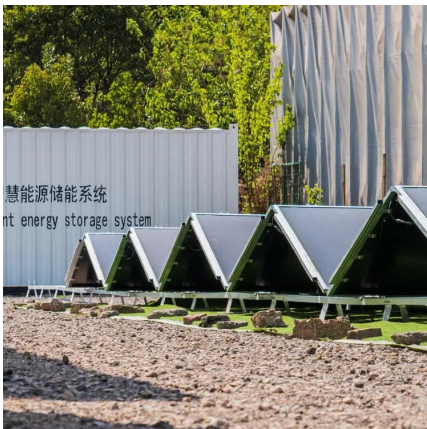

Swiss solar container communication station Inverter Battery Testin

[Battery Energy Storage System and \(PV\) inverter testing](#)

Battery Energy Storage System and (PV) inverter testing Evaluation of full systems or components regarding performance, safety, durability and grid integration with high power, ...
