

Tallinn Energy Storage Power Supply Current Price

Overview

Why do Estonians have electricity plans?

Most Estonians have electricity plans linked to the current spot price, enabling them to respond to hourly price fluctuations and manage their consumption more efficiently. Estonia is an active participant in the European Union's electricity market. This integration is pivotal for the country's energy policy and market dynamics.

How does the Estonian electricity grid work?

The Estonian electricity grid is interconnected with several neighboring countries. These connections facilitate the exchange of electricity and enhance the overall reliability and efficiency of the energy supply.

How much energy does a shower save in Estonia?

As Estonia continues to evolve its energy sector, it remains committed to sustainability, efficiency, and regional cooperation. With the energy-saving shower, you can save up to 50% energy compared to standard shower heads. Or you can shower half the time. With the electricity price today in Estonia you can save 0.64 € for each shower.

What is Estonia's energy landscape?

Estonia's energy landscape is distinct, with a significant portion of its electricity generated from oil shale. This abundant natural resource has historically been the backbone of the country's energy production. While oil shale remains a major energy source, Estonia is gradually diversifying its energy mix.
