# **The largest grid-side energy storage in Busan South Korea**

## Overview

---

What is Gyeongsan substation – battery energy storage system?

The Gyeongsan Substation – Battery Energy Storage System is a 48,000kW lithium-ion battery energy storage project located in Jillyang-eup, North Gyeongsang, South Korea. The rated storage capacity of the project is 12,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology.

Does South Korea have a battery storage system?

In terms of battery storage system deployment, South Korea stands among the global leaders. By the end of 2022, the cumulative installed capacity of battery storage in the country had reached an impressive 4.1 gigawatts. In October 2023, the South Korean government unveiled the Korean Energy Storage Systems (ESS) industry development strategy.

What is Ulsan substation energy storage system?

The Ulsan Substation Energy Storage System is a 32,000kW lithium-ion battery energy storage project located in Namgu, Ulsan, South Korea. The rated storage capacity of the project is 8,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2016 and will be commissioned in 2017.

Are South Korean companies investing in energy storage systems?

Less than a decade ago, South Korean companies held over half of the global energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market.

## The largest grid-side energy storage in Busan South Korea

### [How Busan Is Using Distributed Energy to ...](#)

As a finalist for Korea's first Distributed Energy Specialized Area, Busan's Gangseo District is testing new energy models--including battery storage, virtual net metering, and UPS-as-a-Service--to build a resilient, ...
