

# The simplest single-phase inverter price

## Overview

---

What is a single phase frequency inverter?

Inverter.com online store provides frequency inverters with single phase input to single phase output, rated power ranges from 0.4 kW to 5.5 kW, they are low cost and manufacturer direct sale. Our single phase frequency inverters are specially designed for home power supply and single phase AC asynchronous motor.

What is a 1 phase solar inverter?

1-phase inverters are designed for smaller systems with an output of up to around 10 kW. For larger solar systems that need to generate more electricity, they quickly reach their technical limits. If the energy requirement exceeds this range, single-phase inverters can no longer provide the power efficiently.

What is a single-phase inverter?

Single-phase inverters convert the direct current (DC) generated by solar modules into grid-compliant alternating current (AC). They are particularly suitable for smaller photovoltaic systems in private households or small commercial applications with an energy requirement of up to around 10 kW.

How many kW is a single phase inverter?

inverter.com has 0.4 kW/0.75kW/1.5kW/2.2kW/3.7kW/5kW single-phase inverters to choose from. Single-phase output inverters are usually suitable for small-power three-phase motors, such as fans, water pumps, engraving machines, etc.
